About King Pin Consultancy

TurnKey Solutions

Our core strength lies in offering a unique “Turnkey: Design- & Construct Projects” service, providing clients with a one-stop solution for their project needs

We deliver an all-inclusive package encompassing the full spectrum of professional and construction services across the entire project life-cycle, from initiation to close-out

A significant benefit for clients engaging King Pin Consultancy is the single point of contact they provide, acting as the ‘Consultant’ and being contractually responsible for the successful completion

Our Comprehensive Services

Turnkey (Design & Construct) Projects

From conceptual stage to completion (also referred to as EPCM)

Professional Services, Consulting Engineering, and Project Management

Delivered by registered Consulting Engineers and Construction Project Managers.

Contract Administration and Construction Supervision Services: Utilizing an in-house site management system aligned with ISO 9001 principles

Affiliations: Long-standing relationships with Specialist Consultants and Contractors

The Turnkey Advantage

- **Single Point of Contact**

  Clients deal directly with King Pin Consultancy, who are contractually responsible for project success

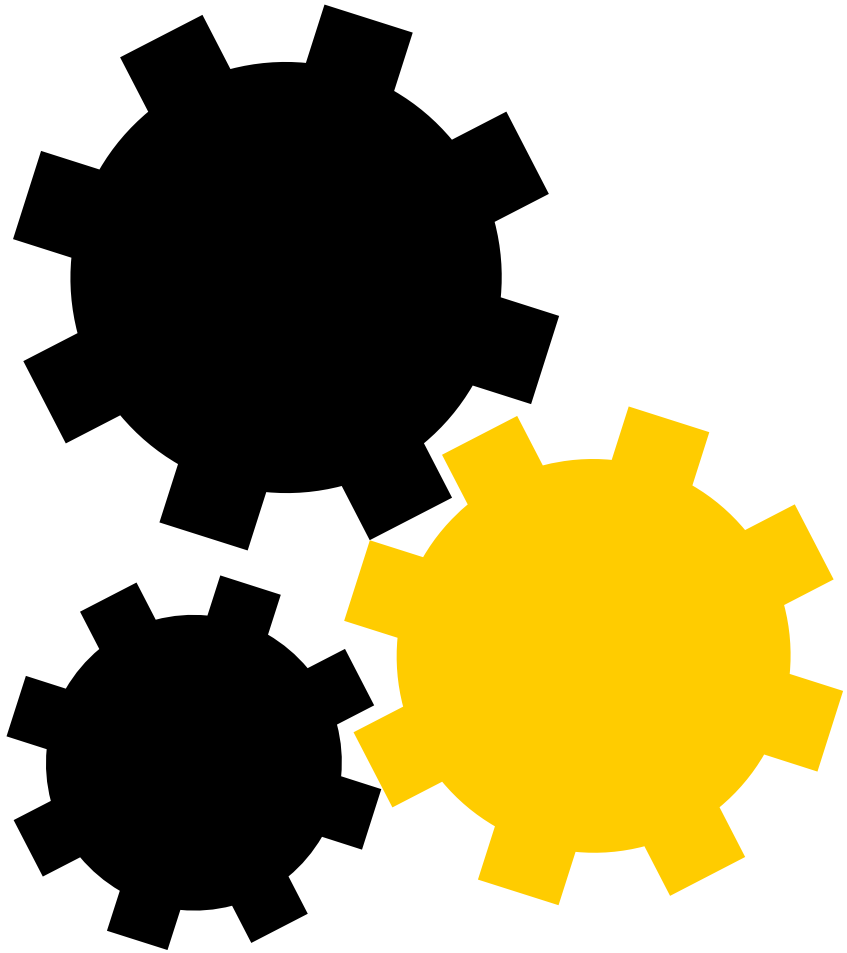

- **All-Inclusive Package**

  Typically delivered at a fixed price or with a pre-determined pricing structure.

- **Comprehensive Scope**

  Includes the full spectrum of professional and construction services

Project Lifecycle Management

Construction Contracts

Management and administration, including documentation coordination.

Construction Contracts

Managing and administering, including preparation and coordination of necessary documentation for effective operation.

Initiation and Briefing

Finalization of the project concept and feasibility

Detail Design Development

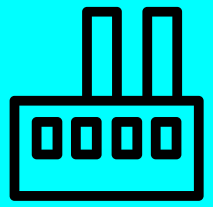

Managed, coordinated, and integrated within project scope, time, cost, and quality parameters.

Procurement Strategies

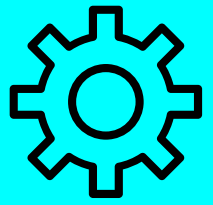

Establishing and implementing procedures, including documentation preparation

WWW.KINGPINCONSULTANCY.CO.ZA

Contract Administration & Supervision

Ensures works are executed in full compliance with technical specifications

Maintains a traceable quality assurance record

Utilizes various standard contract forms including GCC, NEC3, FIDIC, and JBCC

WWW.KINGPINCONSULTANCY.CO.ZA

Engineering Disciplines & Capabilities

Structural Engineering

Design and detailing of reinforced concrete, pre-stressed/post-tensioned concrete, structural steel (heavy & lightweight), masonry, and timber structures.

Reinforced Concrete Structures

Expertly designed and executed for durability and safety.

Steel Structures

Comprehensive solutions for both heavy-duty and lightweight structural steel projects.

WWW.KINGPINCONSULTANCY.CO.ZA

Structural Engineering

Timber and Masonry Structures

Combining traditional materials with innovative designs to meet unique project needs

Health, Safety, Environment & Quality

Quality Assurance

Uncompromising commitment to the safety of all employees and subcontractors.

HSE Systems

Implemented to conform to client requirements and regulations

Safety First

Uncompromising commitment to the safety of all employees and subcontractors.

Quality Control

Includes NDE, pre/post-heat weld treatment, system commissioning, and final handover.

Project Management Expertise

- Comprehensive management and coordination of self-performed and subcontracted work.
- Covers all project phases: estimating, tendering, designing, planning, executing, controlling, and handover.
- Manages project schedules and costs through efficient resource utilization.
- Implements strong change procedures and manages scope creep.
- Manages construction claims.
- Implements site safety and security procedures.
- Ensures project plans are executed by coordinating activities and interfaces.
- Manages construction activities according to drawings, specifications, schedules, costs, quality, and safety standards.
- Proactive identification and resolution of emerging engineering issues.

Vision

To lead innovation in multidisciplinary engineering and project management, creating transformative change through pioneering thinking and unparalleled solutions.

Mission

To turn aspirations into reality by delivering unmatched professional services, ensuring excellence across engineering, project management, and turnkey solutions for a diverse range of industries.

Values

At King Pin Consultancy, we are driven by:

- **Professionalism:** Upholding the highest standards in every aspect of our work.
- **Commitment:** Dedicated to achieving client success through resilience and
- determination.
- **Excellence:** Striving for superior results in everything we undertake.
- **Integrity:** Building trust through transparent, honest interactions.
- **Innovation:** Challenging conventional methods to unlock new possibilities.
- **Service-Oriented Approach:** Putting client needs first, with tailored solutions.
- **Collaboration:** Fostering teamwork across industry partnerships for greater impact.

Key Personnel - Dirk van der Merwe

Director

Wealth of Experience: 38 Years in the Engineering and Construction Industry

Extensive Industry Exposure: Oil and Gas, Petro Chemical, Mining, Power Generation, Renewable Energy, and General Design, Manufacturing, and Construction.

•Proven Track Record: Managed projects valued up to R2.8 billion for Corporate Companies.

•Unique Expertise: Demolishing and recovery of production facilities, reverse Engineering/Erection methodology due to expertise in Construct Ability and sequencing.

•Passion for Development: Committed to self-development and the training of others.

•Current Roles: Director of King Pin Consultancy Group Pty Ltd, SBEC Engineering and Construction South Africa, and CLOBEB Holdings PTY LTD Botswana.

•Previous Employers: Kentz Constructors (SNC Lavelin), Fluor Construction, Group 5 Oil and Gas, WBHO Pipelines, and Stein Muller.

•Career Progression: Started as an apprentice, holding Engineering and Project Management degrees, with extensive practical experience.

Dirk van der Merwe - Technical Expertise Highlights

Civil, Structural & Plate work, Tank Building, Piping, Static and Rotating Mechanical Equipment for various industries

Structural & Plate work, Tank Building, Piping, and Static and Rotating Mechanical Equipment for various industries such as Petro Chemical, Oil & Gas, Mining, and Power Generation. His specific experience includes Civil and Earthworks such as earthworks, foundations, and roadworks. In Structural and Plate work, his expertise extends to the design, manufacture, and installation of steel structures, pipe racks, tanks, hoppers, chutes, and conveyors. Regarding Piping, he is skilled in the design, fabrication, installation, testi
various piping material
