REAKGONA MINE RESOURCE (PTY) LTD

Req: 2018/395752/07

Executive Summary

01

100% black owned

Founded with a mission to deliver specializedmining services with uncompromising integrity and performance.

02

Two Strategic Divisions

Reakgona operates with two distinct business divisions, each offering unique mining and operational services.

03

Compliance and SHEQ Integration

Fully compliant with client-specific SHEQ and environmental requirements, continuously audited and reviewed.

03

Tailored Management System

Utilizes LAMACS system to provide detailed operational insights, ensuring client-aligned reporting and accountability.

Strategically Structured Operations

Core Business Divisions

Our company specializes in seamlessly integrating mining services and advanced pump solutions, tailored to meet the unique needs of every client. From underground and surface mining operations—including sweeping, cleaning, vamping, and ventilation—to delivering high-performance pumps and OEM-compatible spare parts, we ensure reliability and efficiency. With a strong focus on safety and customized solutions, our divisions work hand-in-hand to drive sustainable success and exceed expectations in every project.

Mining Services Division

Focuses on underground and surface mining operations including sweeping, cleaning, vamping, and ventilation services.

Pump Supply & Maintenance

Delivers high-performance slurry, sump, gravel, and centrifugal pumps along with 100% OEM-compatible spare parts.

Client-Centric Customization

Both divisions are tailored to align precisely with client specifications and contractual deliverables.

Integrated Safety Standards

Divisions operate with unified compliance under SHEQ policies to ensure safe and sustainable practices.

SHEQ Policies and Culture at Reakgona

Health, Safety & Environmental Compliance

SHEQ Integration

Health, safety, environment, and quality systems are fully integrated and actively managed.

Continuous Auditing

Regular audits ensure compliance with all client and regulatory requirements.

Shared Responsibility Culture

All employees and contractors are accountable for maintaining safety and environmental standards.

Sustainable Practices

Operational procedures are designed to minimize risk and environmental impact.

Operational Transparency through LAMACS

Management Systems & KPI Reporting

Reakgona Mine Resource applies a comprehensive and technologically advanced management approach using the LAMACS system. This custom-built platform enables precise control and real-time visibility into every facet of our operations, creating a foundation of transparency and accountability. Our KPI system is robust and multidimensional—tracking performance on a weekly and monthly basis. These indicators are directly linked to penalty scorecards, incentivizing high performance and ensuring contract compliance. It's more than a tool—it's a discipline that permeates all our project workflows. Every report we produce is aligned with Service Level Agreements (SLAs), ensuring that our clients receive not just service but assurance. Through LAMACS and data-driven management, we empower clients with detailed insights and performance visibility that supports strategic decisions and operational efficiency.

LAMACS System Utilization

Custom-designed system for managing and reporting all activities with precision.

Real-Time KPI Tracking

Weekly and monthly tracking tied to penalty scorecards for contract accountability.

Client-Aligned SLAs

Reports generated in line with Service Level Agreements to meet contractual obligations.

Data-Driven Decision Making

Operational decisions are guided by performance metrics and audit trails.

Over Six Years of Proven Mining Excellence

Operational Experience & Reliability

Established in 2018

Founded with a focus on sustainable, client-oriented mining services and solutions.

LEARN MORE

Reakgona Mine Resource, established in 2018, has become a trusted name in South Africa's mining sector. With over six years of consistent service, we exemplify reliability, innovation, and performance across all projects. Our business model emphasizes long-term partnerships, prioritizing client needs, safety, and quality. Whether handling sweeping, vamping, or pump logistics, our scalable systems ensure efficient results. Led by a team with over 60 years of combined experience, our leadership provides strategic insight and expert execution—delivering not just operational success but lasting value for our clients.

• 6+ Years in Mining

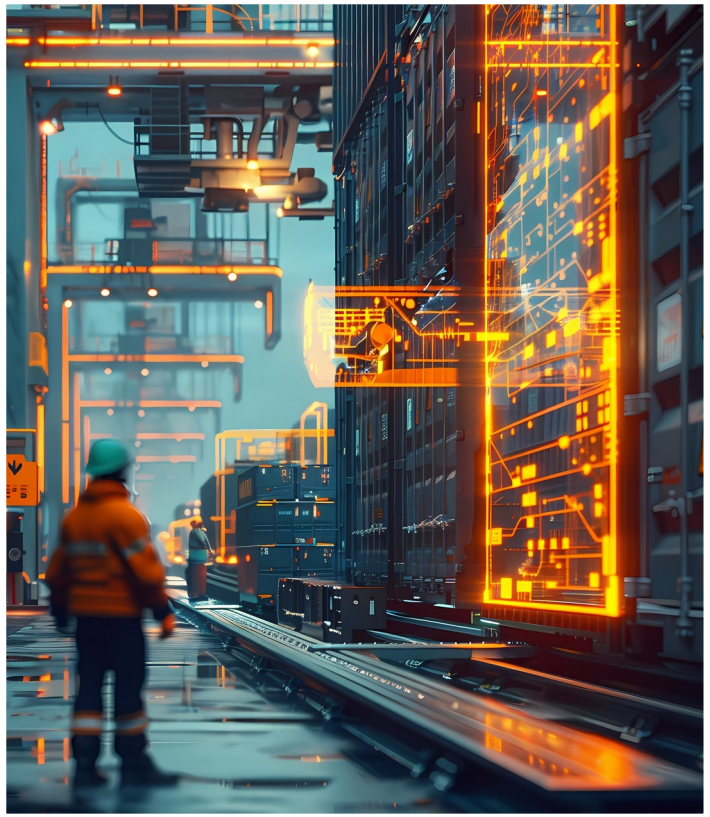

Delivering consistent, reliable, and safe mining operations across multiple projects.

Long-Term Contracts

Operational model built to fulfill long-term, high-value contracts with full accountability.

Experienced Leadership

Directed by three executives with a combined 60+ years in mining, engineering, and logistics.

Guiding Principles of Reakgona Mine Resource

Core Values

Mutual Respect: We treat all clients with dignity, embracing diversity and valuing every contribution.

Integrity: Transparency, honesty, and fairness are foundational to all our operations.

Accountability: We take responsibility for our actions, guided by experience and sound judgment.

Performance: Committed to excellence, we deliver consistently and punctually.

Reakgona Mine Resources is committed to upholding core values that define who we are and guide our operations. We prioritize mutual respect, fostering an inclusive environment where clients, partners, and employees are treated with dignity and appreciation for diverse perspectives. Integrity is at the heart of everything we do—built on transparency, ethics, and fairness. Accountability drives us to take full responsibility for our actions, ensuring every decision is justifiable. Our dedication to excellence fuels our performance, consistently exceeding expectations and delivering quality on time. These principles form the foundation

Comprehensive Mining & Equipment Supply

Service Offering Overview

Pump Systems & Spares

Supply and maintenance of slurry, sump, gravel, and dewatering pumps with OEM-compatible spares.

Mining Operations

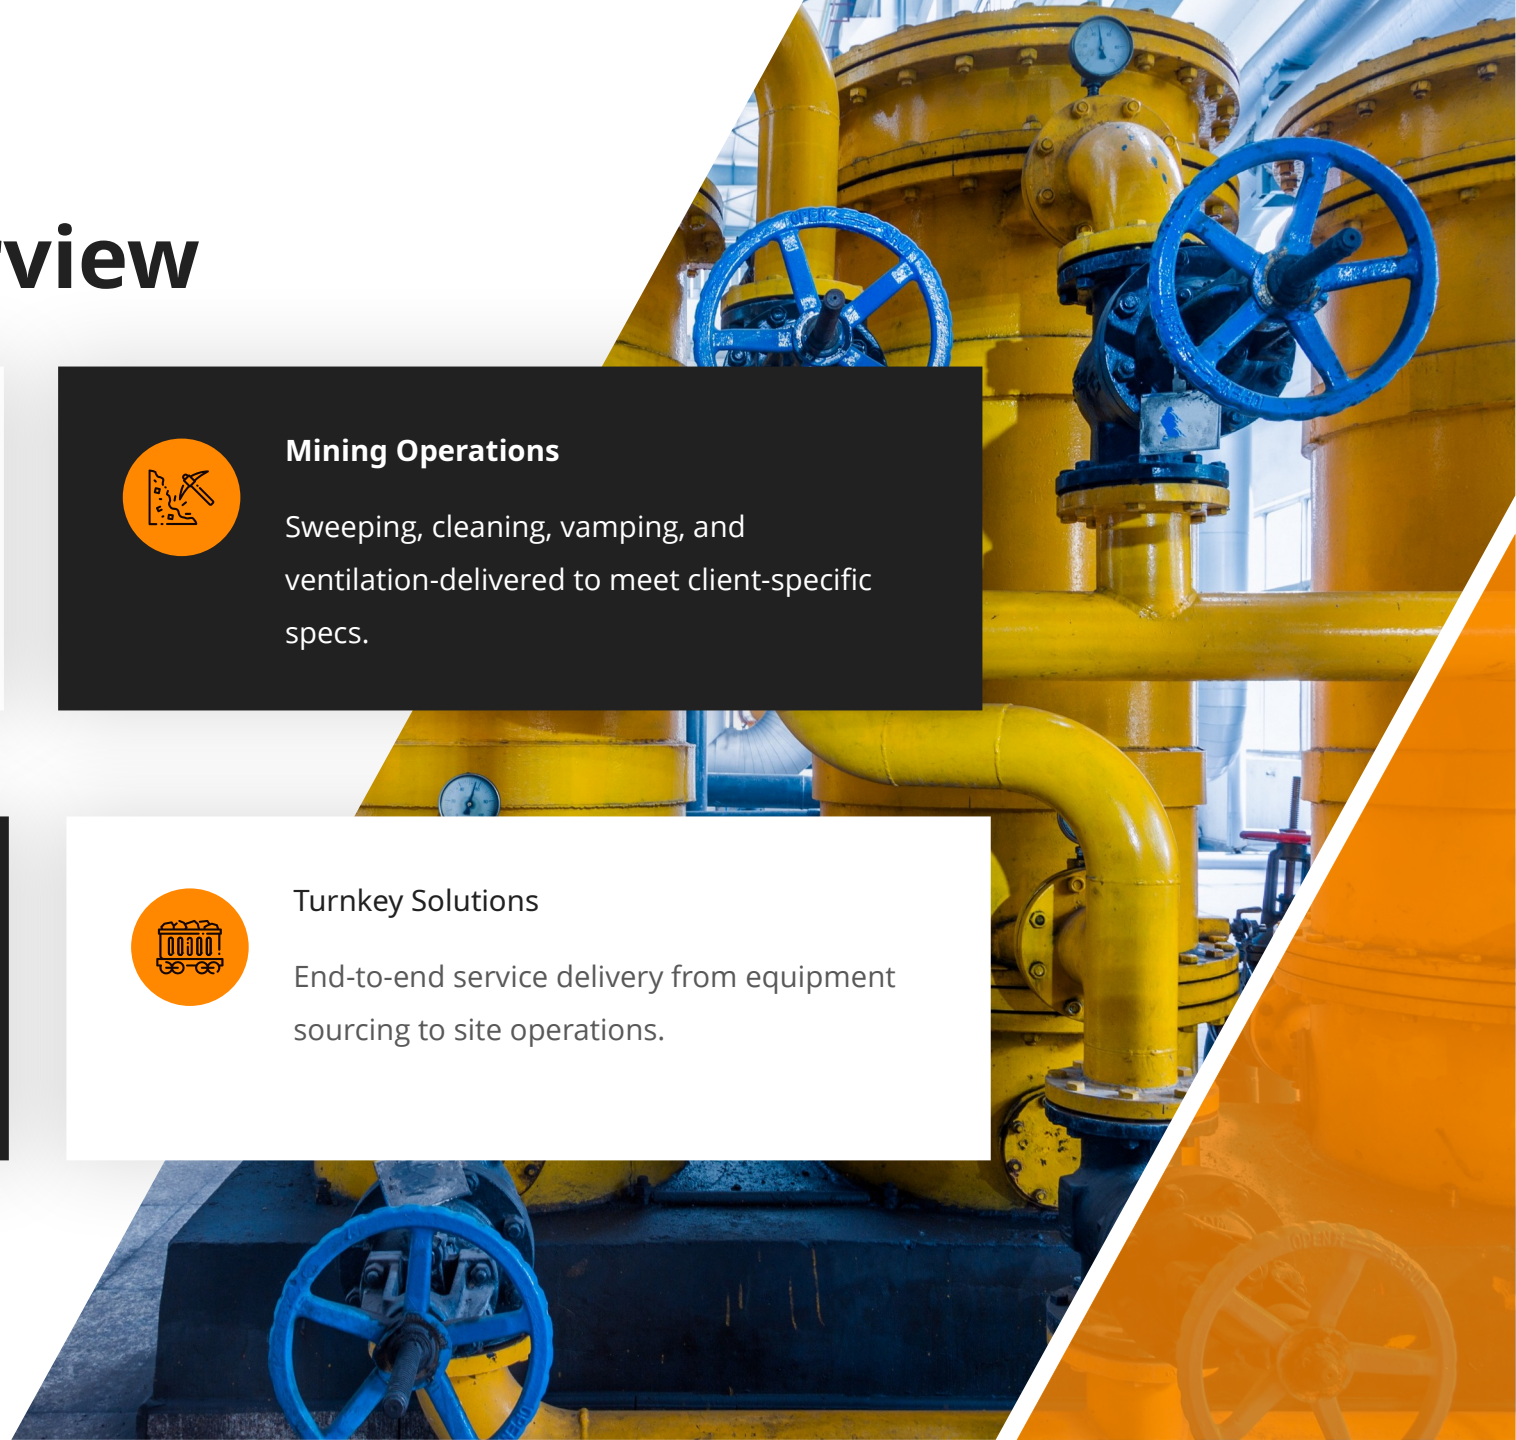

Sweeping, cleaning, vamping, and ventilation-delivered to meet client-specific specs.

Contract Delivery

Capacity to execute contracts of any scale with tailored performance standards.

Turnkey Solutions

End-to-end service delivery from equipment sourcing to site operations.

Comprehensive Mining & Equipment Supply

Service Offering and Capacity

We have the capability to fulfill contracts precisely in line with client specifications, ensuring quality and efficiency at every stage

Mining Division

- Sweeping and Cleaning
- Ventilation
- Vamping

Supply of Pump and Spares

- Slurry pumps-equivalent to theWarman Slurry Pumps- AH-AHPP- P and L
- Dewatering Pump – equivalent of the EnvirotecC5
- Sump Pumps- equivalent of theWarman SP,SPRv (vertical spindle)
- Gravel Pump Equivalent of theWarman G(4,6,8,10).
- Spare parts on all the above pumps which include impellers , throat bushes, volutes,
- expellers, liners, bearing ,assemblies ect.
- Submersible sewage pumps
- Standard centrifugal pumps.
- End suction centrifugal pumps
- Multistage centrifugal pumps
- Dosing pumps

Reakgona Mine Resource

Driving Mining Excellence

Reakgona Mine Resource is committed to delivering cutting-edge solutions that enhance mining efficiency and reliability. Our elite mining services ensure precision in cleaning, vamping, and ventilation, supporting both underground and surface operations with industry-leading expertise. We also provide advanced pump solutions, featuring high-performance slurry, gravel, and submersible pumps, alongside durable multistage centrifugal systems. To maintain seamless operations, we supply OEM-compatible spare parts, ensuring reliability and longevity. At Reakgona, we go beyond service—we offer full-scale project support tailored to our clients' needs, delivering custom solutions that drive operational success and efficiency.

Reakgona Mine Resource

Pumps & Spare Pare Parts Capacity

Reliable Performance, OEM Compatibility, and Rapid Support

Precision Pump Solutions for Mining Excellence

Reakgona Mine Resource has established a robust infrastructure to support the supply and maintenance of industrial pump systems. Our comprehensive range includes slurry, sump, dewatering, submersible, multistage centrifugal, and dosing pumps—each designed to meet the demands of rigorous mining environments.

What sets us apart is our unwavering commitment to OEM compatibility. Every spare part, from impellers and throat bushes to liners and volutes, is fully interchangeable with original models, ensuring seamless operational continuity and cost-efficiency for our clients. Additionally, we maintain a well-stocked inventory of essential components, enabling rapid response to urgent client needs.

Whether for emergency maintenance or long-term equipment support, Rikona's pump solutions deliver exceptional performance, reliability, and strategic value.

Delivering Reliability, Technical Expertise, and Strategic Partnerships

Proven Excellence in Mining Solutions

Over the years, Reakgona Mine Resource has solidified its reputation as a trusted partner to major mining institutions across South Africa. Our project portfolio showcases a consistent track record of on-time delivery, technical proficiency, and strong client relationships.

Notable engagements include maintenance services for Impala Platinum's surface and underground sites, executed under a R2.8 million contract. For RBPlats, we provided sweeping and vamping solutions valued at R2.2 million, prioritizing operational safety and efficiency. In 2019, we successfully completed a complex underground dam installation for Samancor, followed by a significant equipment supply contract with Royal Bafokeng Administration in 2023.

Expanding beyond South Africa, Reakgona Mine Resource has extended its expertise to Zimbabwe, Botswana, and Lesotho, delivering industrial solutions across multiple sectors. Our commitment to technical agility, transparent reporting, and quality assurance remains the foundation of our client satisfaction and project success.

Impala Platinum

Maintenance for surface and underground infrastructure

R2.8M, 2019-2020

RBPlats Project

Sweeping and vamping operations completed successfully

R2.2M,2020-2021

Samancor Project

Executed underground dam project with strategic outcomes

R1.5M, 2019

Royal Bafokeng Administration

Supplied pumps and accessories in major equipment contract

R1.2M, 2023

Health & safety

Building a Culture of Operational Protection

Zero Harm Philosophy

Operational procedures are structured to prevent incidents and protect lives.

Stakeholder Inclusion

All contractors, communities, and employees are part of the safety ecosystem.

SHE System Culture

Integrated approach to Safety, Health, and Environment embedded at all levels

Continuous Improvement

Policies and procedures are regularly reviewed and enhanced.

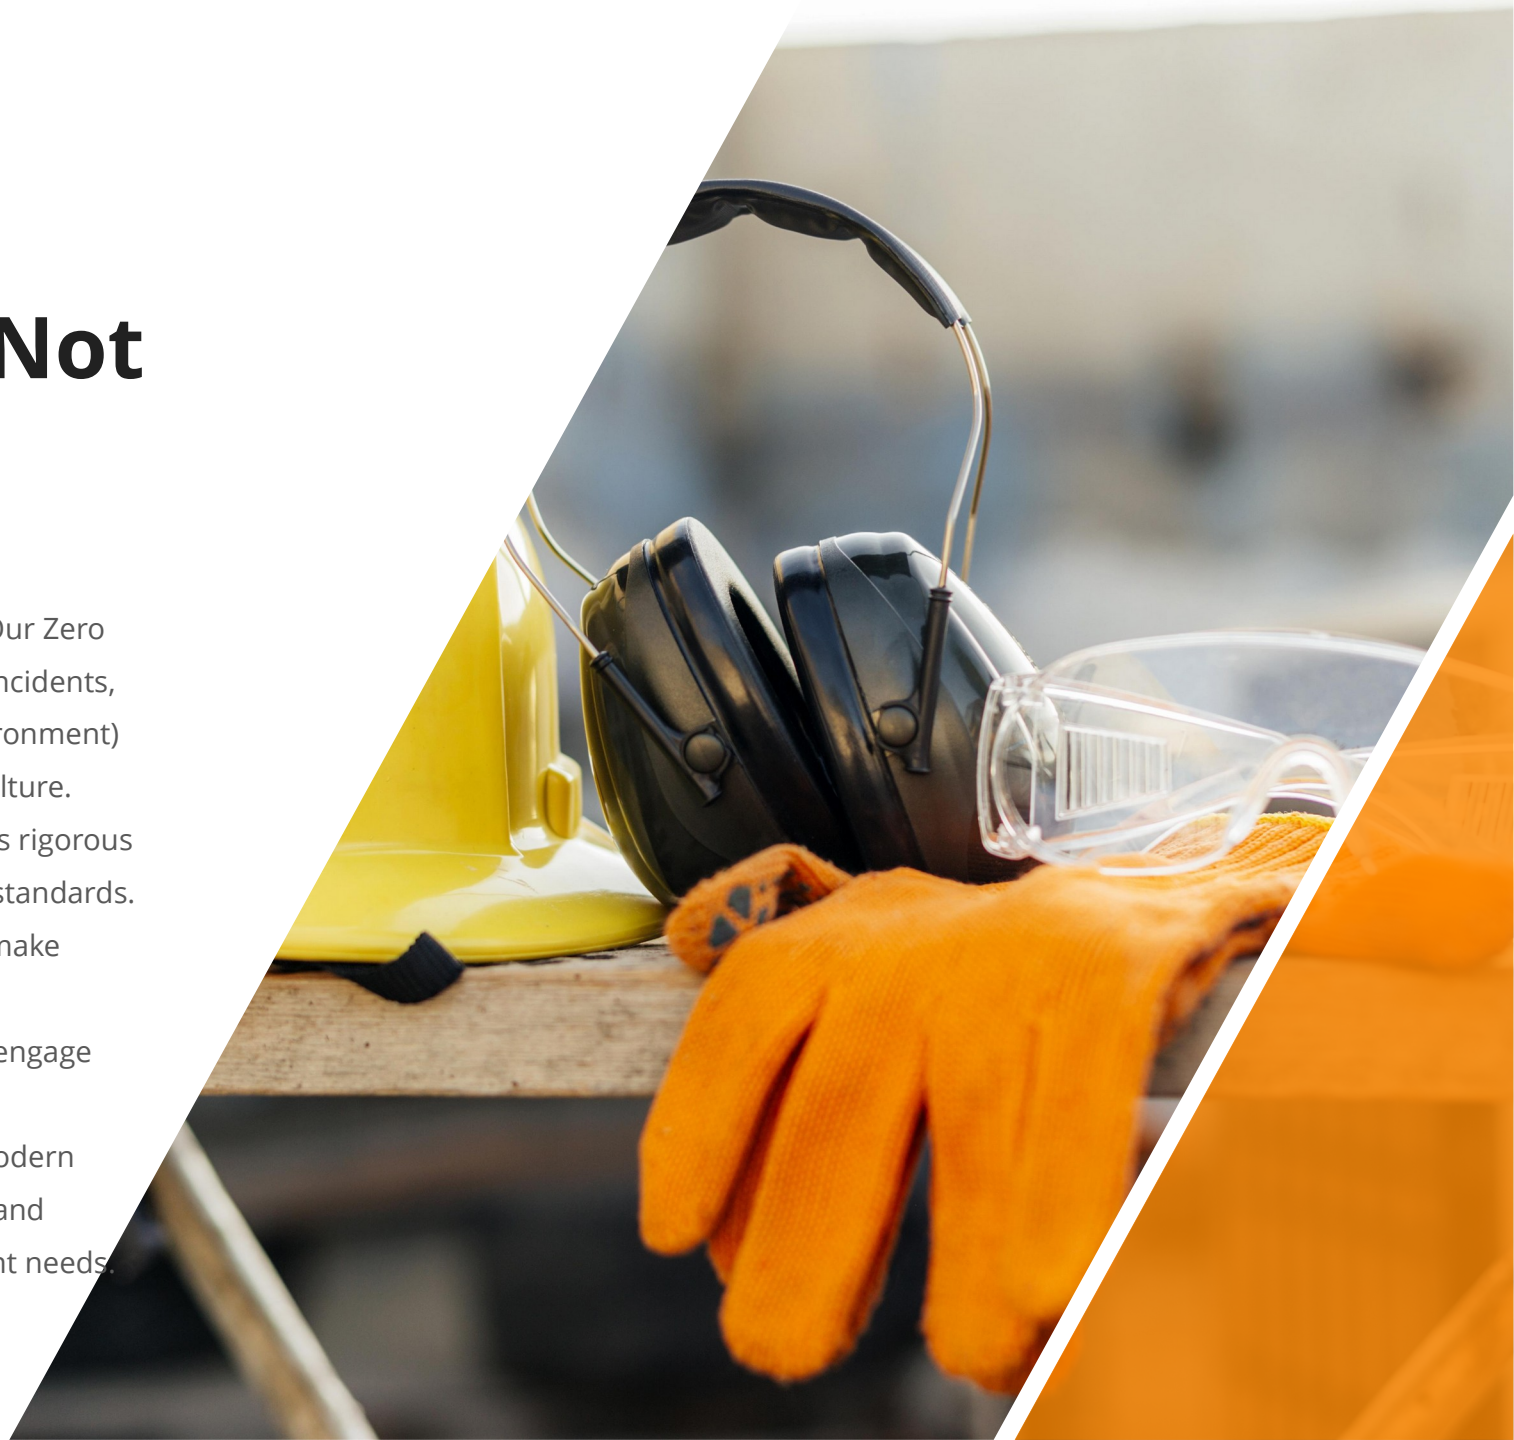

REAKGONA

Commitment to Zero Harm and a Culture of Protection

Safety: A Core Value, Not Just a Regulation

At Reakgona Mine Resource, safety is more than compliance—it is a fundamental principle that guides every aspect of our operations. Our Zero Harm philosophy ensures that every action is designed to prevent incidents, injuries, and environmental risks. Our SHE (Safety, Health, and Environment) system is comprehensive and deeply embedded in our company culture. Every team member, from leadership to operations staff, undergoes rigorous training and is held accountable for maintaining the highest safety standards. We empower our people with the knowledge and responsibility to make safety-driven decisions at all times.

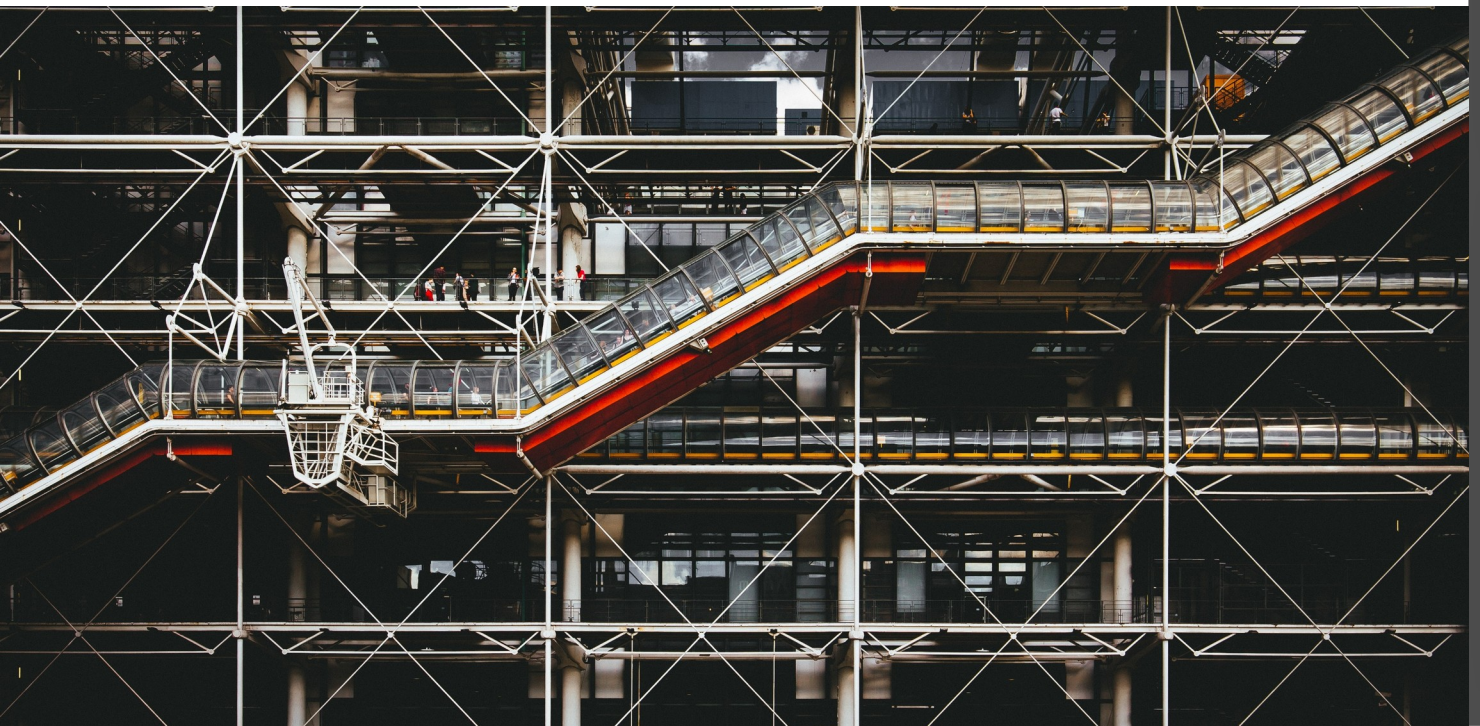

Recognizing that safety extends beyond our workforce, we actively engage communities, contractors, and clients, fostering a shared culture of protection. Through continuous improvement and adaptation to modern challenges, we ensure that our SHEQ (Safety, Health, Environment, and Quality) practices align with evolving industry expectations and client needs.

Driving Sustainable Growth and Operational Excellence

Leadership Rooted in Expertise and Strategic Vision

At the core of Reakgona Mine Resource's success is a leadership team with deep industry roots and multidimensional expertise. Each director brings not only years of experience but also a strategic mindset that ensures sustainable growth and operational efficiency

sekwati@reakgona.co.za

CEO Sekwati Dennis Phasha

possesses a rich background in engineering, administration, and logistics, reinforced by academic and professional certifications. His holistic understanding of business and public service frameworks enables high-level oversight and governance.

phuti@reakgona.co.za

Technical Director Phuti Mabotja

has been a key figure in the mining sector since 2004, with expertise in mechanical and electrical engineering. His extensive on-site leadership experience ensures technical precision across all operations.

mando@reakgona.co.za

Financial Director Mando Dire

brings entrepreneurial acumen and financial rigor, backed by certifications in corporate governance, financial management, and business planning. His strategic approach strengthens the company's fiscal foundation. Together, this leadership team exemplifies balance, foresight, and executive capability, driving Reakgona Mine Resource toward continued success. `
